Executive Profile

Founder and operator of eight registered Philippine businesses spanning corporate transport, industrial supply, automotive upholstery, catering, vehicle rental, and distribution, together generating close to ₱1 billion in combined revenue and serving over 100 corporate clients. Fourteen years of building operations from the ground up, with direct personal ownership of the functions most owners delegate: BIR and SEC compliance, multi-entity bookkeeping, payroll, procurement, contract negotiation, and the operational software that runs it all. Now available for consulting, advisory, and executive engagements where that same discipline can be applied inside other organizations.

Professional Experience

Founder & President • CHEM Tourist and Transport Services OPC 2012 – Present

- **Corporate leadership.** Built the flagship transport company from initial operations to a 30+ unit fleet and 60+ workforce serving industrial and corporate accounts across the Calabarzon region.
- **Contract negotiation & client retention.** Secured and renewed long-term employee shuttle contracts with multinational manufacturing clients, structuring fuel escalation clauses and rate adjustment mechanisms that protect margin without renegotiating the relationship.
- **Fleet & route economics.** Developed route-level pricing models incorporating fuel, maintenance, driver cost, utilization, downtime, and compliance overhead; produced client-facing cost-reduction proposals that reduced spend while preserving service levels.
- **Regulatory compliance.** Maintained full LTRFB and LTO franchise and unit compliance alongside BIR and SEC obligations, keeping the company eligible for enterprise and institutional bidding.
- **Safety & performance management.** Instituted driver management structures, incident reporting, and monthly operational KPI reporting delivered to client management.

Managing Partner • RBJ Seat Master Philippines Co. Present

- **Multi-branch back office.** Own finance, HR, and compliance across multiple branches, including payroll for a 60-person workforce with automated scheduling of SSS, PhilHealth, Pag-IBIG, and withholding tax deductions.
- **Systems & controls.** Designed and deployed an in-house payroll dashboard replacing manual computation, eliminating reconciliation errors and cutting payroll preparation time.
- **Procurement & supplier management.** Manage inventory, supplier negotiation, and manufacturing coordination across branch operations.

Principal Consultant • BlueScale Integrated Business Support Present

- **Compliance & bookkeeping practice.** Deliver full-cycle bookkeeping and BIR compliance for 18 active client accounts spanning transport, food service, retail, industrial supply, and individual taxpayers, from OPCs to sole proprietorships.
- **Statutory filings.** Manage VAT, EWT, SAWT, SLSP, loose-leaf and computerized books of account, and SEC corporate compliance across a multi-entity client portfolio.
- **Digital services line.** Scope and build operational software for clients: dashboards, client portals, accounting systems, and business websites.

Owner & Operator • CDSC Industrial Supply • Chef David Catering • TRES Prime-Drive • Annapurna • Legal Ride Present

- **Institutional supply (CDSC).** B2B supply to hospitals, government agencies, and industrial clients, with consignment account management, delivery-to-invoice reconciliation, and BIR Form 2307 handling built into the workflow.
- **Food service (Chef David).** Corporate and industrial catering with over a decade of continuous operation; own bookkeeping, filings, and ingredient cost controls.
- **Vehicle rental (TRES Prime-Drive).** Self-drive and chauffeured rental operation running on a purpose-built 15-module operations platform.
- **Distribution (Annapurna) & transport compliance (Legal Ride).** Grocery and essential goods distribution including the Annapurna Gold cooking oil line; transport franchise and permit compliance services for third-party operators.

Business Systems Developed

ChemFleet — Fleet operations platform: shuttle scheduling, trip logging, billing integration, and reconciliation between operations schedule and sales journal. Next.js • Supabase • Vercel

Computerized Accounting System — Nine-module BIR-compliance-ready CAS: journal, general ledger, VAT, EWT/SAWT, SLSP, trial balance, and compliance calendar with multi-entity switching. React

RBJ Payroll Dashboard — Live multi-branch payroll for 60+ workforce with automatic statutory deduction scheduling. Web dashboard · Google Sheets API

CDSC Client Portal — Client-facing catalog, quotation, order tracking, and billing portal with row-level security on all account data. Supabase · RLS

TRES Prime-Drive Operations System — Fifteen-module rental platform: bookings, unit tracking, invoicing, quotations, auto-computed financials. Web application

Corporate Websites — Designed and shipped in-house for CHEM, BlueScale, and CDSC. HTML · Netlify

Core Competencies

Leadership & Strategy

- Executive Leadership
- Business Strategy
- P&L Ownership
- Strategic Planning
- People Leadership
- Crisis Management

Finance & Compliance

- BIR Compliance
- VAT / EWT / SAWT
- SEC & OPC
- LTFRB / LTO
- Multi-Entity Bookkeeping
- Payroll
- Cost Control
- Pricing Strategy

Operations

- Fleet Operations
- Route Optimization
- Dispatch Systems
- Process Improvement
- SOP & ISO Documentation
- Vendor Management

Commercial & Digital

- Contract Negotiation
- Procurement
- Supply Chain
- Business Development
- ERP & Systems Design
- Data Analytics

Technical Skills

Development React, Next.js, JavaScript, HTML, CSS, Tailwind CSS, Python, SQL **Business Software** QuickBooks, Microsoft 365 (Excel, Word, PowerPoint), Google Workspace, Google Apps Script

Data & Platform Supabase, PostgreSQL, Row-Level Security, REST APIs, Git, GitHub, Vercel, Netlify **Systems Built** ERP, CRM, Fleet Management, Payroll, Inventory, Accounting, Dashboard Analytics

Selected Achievements

- Built and scaled a transport operation to **30+ vehicles and a 60+ workforce** serving industrial clients, from a single-owner start in 2012.
- Grew a portfolio to **eight registered operating entities** across six industries with combined revenue approaching **₱1 billion** and **100+ corporate clients**.
- Established an in-house compliance function servicing **18 external client accounts** in addition to all owned entities, with no outsourced accounting.
- Designed and deployed **six production business systems** without outsourced development, including a nine-module BIR-ready accounting system and a live multi-branch payroll platform.
- Negotiated and retained long-term corporate shuttle contracts through fuel volatility by structuring escalation mechanisms into service agreements.
- Maintained **continuous LTFRB, LTO, BIR, and SEC compliance** across all entities, preserving eligibility for institutional and government bidding.

Leadership Philosophy

Reliability compounds. A shuttle that arrives at 4:50 for a 5:00 pickup, every day, is worth more than any marketing, and contracts renew on consistency rather than promises. Clean books are not overhead; they are what allows a business to bid for enterprise and government work at all. If something matters, it is documented, because paper trails protect relationships and settle disputes before they start. And pricing is built from real cost, since a rate that wins the contract but cannot sustain the service costs both parties more in the end.

Capital Markets

Active in Philippine listed equities through FirstMetroSec and BPI Trade, with documented entry thesis and defined exits on every position. Currently studying foreign exchange markets on IC Markets and LiteFinance under a structured risk framework prior to committing significant capital. Built a personal trading journal and study application with trade logging, position sizing, risk tracking, and performance analytics.
